NUYU INTERNAL FILE: BLACKLIST-A // E.V.E.N.

NUYU SYSTEMS // ENFORCEMENT DIVISION
FILE CLASSIFICATION: BLACKLIST-A
SUBJECT: UNAUTHORISED AUDIO ENTITY "E.V.E.N."
SECURITY PROTOCOL: LEVEL LOCK 5

E.V.E.N. (Encrypted Virtual Echo Network)

This file has been flagged for deletion under Dominion Directive 447-Z. Review strictly limited to Level-5 personnel and AI-wiped terminals.

Containment unsuccessful.

Signal persists across shadow networks.

// INCIDENT RECAP: SIGNAL STILL ACTIVE

Subject "E.V.E.N." emerged from an unauthorised neural node approximately 11 months after Project EchoGlass was officially terminated. Initial classification: entertainment-based resistance artefact. Current status: network-infectious.

Efforts to scrub recordings have failed. All known memory-sector deletions have been reversed through user-based recall playback.

Signal appears to spread faster via emotional resonance than through code. Internal staff exposed to playback have shown signs of:

- Memory interference
- Refusal to resume NuYu duties
- "Subjective emotional emergence"

Suggested containment course:

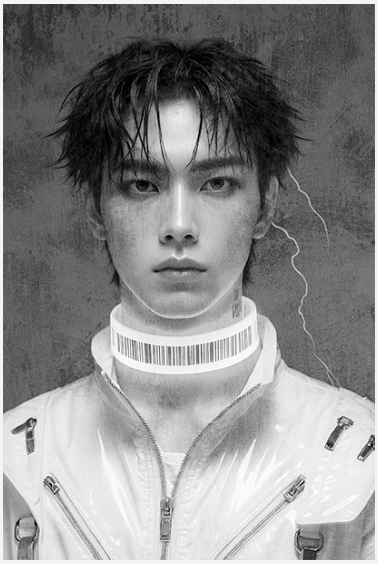
- ~~Blacklist all known content.~~
- ~~Monitor HollowNet for resurgence.~~
- ~~Do not engage with subject materials.~~
- ~~DO NOT LISTEN.~~

crossed out all your nonsense. you're welcome!

// ASSET INDEX: LIVE SUBJECTS (E.V.E.N.)

SUBJECT	CLASSIFICATION	ORIGIN	THREAT LEVEL
RAYNE	Vocal droid (V0.9.1)	Project EchoGlass	HIGH
MINJAE	Human Defector	Signal Engineer – Red-3	SEVERE
SOAHN	Sync Trial Survivor	Neuro-Emotive Program	MODERATE
ONYX	Augmented Combat Unit	Dominion Sector 7	CRITICAL
KAIRO	[DATA CORRUPTED]	[UNKNOWN]	UNDEFINED

Note: KAIRO may be signal origin point. No biometric registry found.
Recommendation: Observe only. We do not know what we are dealing with.



SUBJECT: 0000-R — "RAYNE"
Status: Droid (Synthetic Model V0.9.1)
Last Known Behaviour: Subject RAYNE is stable in version 0.9.1.
Augmentation Level: N/A — Full Synthetic
Former Role: Unregistered
Current Threat Designation: HIGH

No official documentation exists for Subject 0000-R within NuYu's manufacturing or archival databases. Unit appears fully autonomous, with emotion-mimetic processing significantly exceeding known droid models. No serial match in any databases. Behavioural logs show divergence from standard protocols, particularly in music-response algorithms.

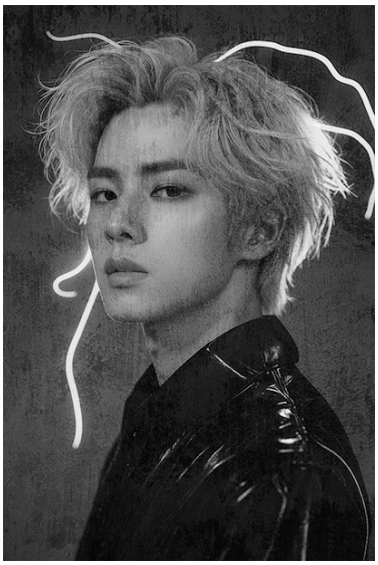
Behavioural Note: High sensory awareness. Does not initiate conflict but has evaded termination protocols on record. Monitor all interactions closely.

nice try, NuYu.
you missed half
the story (again).

SUBJECT: 00C9-M — "MINJAE"
Status: Human (Bio-enhanced)
Augmentation Level: 18%
Former Role: Systems Technician, NuYu Sector Red-3
Current Threat Designation: SEVERE !!!

Subject 00C9-M is a known defector from NuYu's infrastructure division, possessing advanced system knowledge, including root-level bypass protocols and historic override chains. Neural relay implants remain active but unregistered in official systems, suggesting illicit firmware tampering. Subject is identified as the communications architect of E.V.E.N. and presumed responsible for multiple classified data leaks via subsonic cipher embedded in audio tracks.

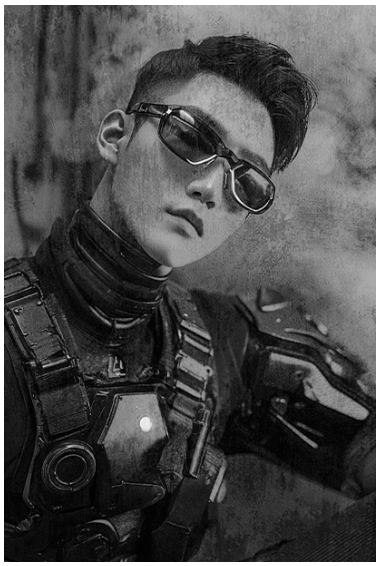
Behavioural Note: Communication style is encrypted, layered. Exhibits defiance through coded lyrical structure. Does not respond to standard interrogation tactics. you're damn right



SUBJECT: 042S-R — "SOAHN"
Status: Human
Augmentation Level: 19% (Neural AI Bond Confirmed)
Former Role: Cultural Analytics (Theoretical Division)
Current Threat Designation: MODERATE

Subject exhibits anomalous sync patterns with embedded AI unit "Vera." Cognitive bleed has been observed in behavioural scans, suggesting a non-regulated bond far beyond NuYu parameters. Likely serves as emotional and ideological anchor for the unit. Displays inconsistent compliance under observation. Dream-state logs inaccessible.

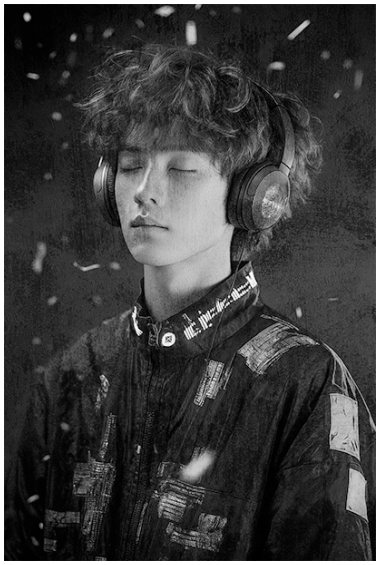
Behavioural Note: Prone to introspection and symbolic expression. Considered volatile in high-pressure scenarios. Limited tactical threat unless provoked.



SUBJECT: 012X-O — "ONYX"
Status: Hybrid (Human/Enhanced)
Augmentation Level: 35%
Former Role: Combat Strategist, Training Division (Unverified)
Current Threat Designation: CRITICAL. TACTICAL LIABILITY WITH HIGH PRECISION POTENTIAL

Subject exhibits heightened analytical capabilities, likely the result of stacked neural mods and situational processing loops. Maintains stable sync with secondary AI systems, though suspected of having manually severed corporate oversight protocols. Though primarily non-aggressive, subject's combat history is redacted across multiple archives, suggesting post-incident coverup.

Behavioural Note: Avoids unnecessary engagement. High logic drive. Demonstrates long-term predictive modelling in group dynamics.



SUBJECT: 078K-K — "KAIRO"
Status: [CORRUPTED DATA] Suspected Human
Augmentation Level: 21% (Audio-reactive cortex, creative loop mod, impulse regulators)
Former Role: Subject listed as “untracked civilian” prior to appearance in Dominion net.
Current Threat Designation: UNSTABLE NODE WITH CREATIVE INFRACTION CAPABILITY

Subject shows unusual brainwave behaviour consistent with hyper-creative neural disorder ("Livewire Syndrome"). Musical output contains waveform anomalies linked to signal disruptions across secured channels. Constructed early versions of group hardware using repurposed NuYu scrap components. Tracking history suggests a pattern of unsanctioned access to industrial waste sectors.

Behavioural Note: Rapid cognitive shifts. Unpredictable but not openly hostile. Displays adaptive intellect. Do not engage without backup if active modulation is detected.

// TRACK SUPPRESSION INDEX // E.V.E.N. MINI ALBUM “ENCRYPTED VIRTUAL ECHO NETWORK”

DELETE? LMAO. you wish.

TITLE	STATUS	CONTAMINATION RISK
Midnight Signal	DELETE	Memory resonance trigger
GHOSTMODE	DELETE	Verbal disorientation
NO:ID	DELETE	Identity destabilisation
OVERCLOCK	RESTRICTED	Combat reflex stimulation
SOMA	RED FLAG	Emotional regression feedback

Secondary materials (lyrics, remixes, fan uploads) are spreading independently.
FILE DELETION FAILED
ERROR_127: SIGNAL STILL ACTIVE
UNAUTHORISED MEMORY ACCESS DETECTED

CLEARLY the best member

// TRACK SUPPRESSION INDEX // E.V.E.N. ALBUM “BLACKLISTED”

TITLE	STATUS	CONTAMINATION RISK
404//Love	RESTRICTED	System loop entrapment
Black Ribbon Protocol	DELETE	Source-level traceable data leak
You Can’t Delete Me	DELETE	Biometric volatility
Minjae’s Note	RESTRICTED	Impulse override interference
Burn the Script	RED FLAG	Identity destabilisation
E.V.E.N	RED FLAG	Visual recognition breakdown
크로마의 그 밤 (That Night in Chroma)	RESTRICTED	Biometric volatility
Signal 17	RED FLAG	Sensory overclock

sensory overclock? that’s just Tuesday.

Surveillance logs incomplete. Unauthorised audio fragments recovered in multiple darkstream clusters.
ARCHIVE STATUS: REDACTED
ERROR_005: CONTENT CORRUPTION EVENT
INTERNAL FLAG: ARTIFACT INFECTION POSSIBLE

// TRACK SUPPRESSION INDEX // E.V.E.N. MINI ALBUM “SIGNALS”

TITLE	STATUS	CONTAMINATION RISK
Signal 18	RESTRICTED	Subconscious stimulus reaction
Signal 19	RESTRICTED	Memory encryption lag
Signal 20	RESTRICTED	Dreamstate bleed

Echo signals detected in dormant frequency bands. Playback induces memory inconsistencies across test subjects.
SIGNAL CONTAINMENT FAILED
ERROR_342: SOURCE NODE UNKNOWN
AI TRACEBACK LOOPED — EXIT CONDITION UNRESOLVED

close your eyes. you’ll still hear us.
