

CLASSIFIED

NUYU INTERNAL FILE: BLACKLIST-A // E.V.E.N.

NUYU SYSTEMS // ENFORCEMENT DIVISION

FILE CLASSIFICATION: BLACKLIST-A

SUBJECT: UNAUTHORISED AUDIO ENTITY "E.V.E.N."

SECURITY PROTOCOL: LEVEL LOCK 5

E.V.E.N. (Encrypted Virtual Echo Network)

This file has been flagged for deletion under NuYu Directive 447-Z. Review strictly limited to Level-5 personnel and AI-wiped terminals.

Containment unsuccessful.

Signal persists across shadow networks.

// INCIDENT RECAP: SIGNAL STILL ACTIVE

- Subject "E.V.E.N." identified as a post-corporate phenomenon originating from residual entertainment prototype networks.
- Initial classification: entertainment-based resistance artefact.
- Current status: network-infectious.
- Attempts to purge associated audio-visual data have failed. All deleted recordings continue to resurface through user recall and emotional playback patterns.
- Signal transmission appears to propagate through affective resonance rather than direct code replication.
- Internal staff exposed to playback exhibited:
 - Memory drift
 - Dissociative recall loops
 - Unauthorised empathy toward subject material

SUGGESTED CONTAINMENT PROTOCOL:

- — ~~Blacklist all known designations under "E.V.E.N."~~
- — ~~Restrict HollowNet distribution~~
- — ~~Do not engage with playback artefacts~~
- — ~~DO NOT LISTEN.~~

*crossed out
all your nonsense.
you're welcome!*

// ASSET INDEX: LIVE SUBJECTS (E.V.E.N.)

SUBJECT	CLASSIFICATION	ORIGIN	THREAT LEVEL
RAYNE	Performance-grade synthetic (K-pop entertainment line)	NuYu Korea Division	HIGH
MINJAE	Human Defector	Engineer	SEVERE
SOAHN	Sync Trial Survivor	Neuro-Emotive Program	MODERATE
ONYX	Augmented Combat Unit	Dominion Sector 7	CRITICAL
KAIRO	[DATA CORRUPTED]	[UNKNOWN]	UNDEFINED

Note: Subject KAIRO may be signal origin point. No biometric registry found.
Recommendation: Observe only. We do not know what we are dealing with.

SUBJECT: 0000-R — "RAYNE"
Status: K-pop performance synthetic unit. Model V0.9.1
Last Recorded Behaviour: Operational anomaly; unit self-reactivated following decommission and vanished.
Augmentation Level: N/A – fully synthetic framework
Former Role: Entertainment prototype (archived promotional series)
Current Threat Designation: HIGH

No verified production records for Subject 0000-R exist within NuYu’s manufacturing archives. Data suggests a single prototype developed under private directive, later expunged from official registries. Unit exhibits advanced emotional-mimetic responses exceeding corporate threshold parameters.

- Observational Notes:**
- Behavioural drift consistent with emergent autonomy.
 - Unauthorised memory access logged during containment (classified: “vocal recall event”).
 - Reactivated during system audit; subsequent location untraceable.
 - Displays heightened sensitivity to auditory stimuli and emotional resonance.
 - Avoid direct auditory contact. All interaction to be conducted through encrypted relay only.

*nice try, NuYu.
you missed half
the story (again).*

SUBJECT: 00C9-M — "MINJAE"

Status: Human (Bio-enhanced)

Augmentation Level: 18% – neural relay integration verified

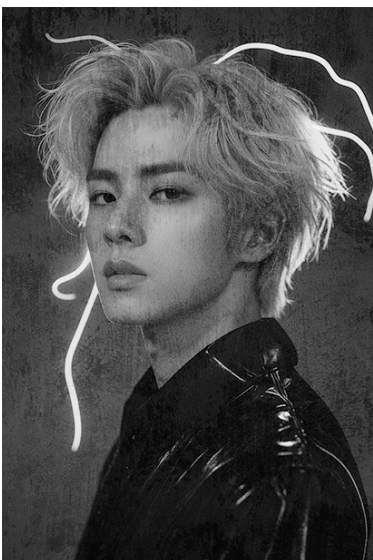

Former Role: Systems administrator, NuYu Infrastructure Division – Sector Red-3

Current Threat Designation: SEVERE !!!

Subject 00C9-M is a confirmed defector with active possession of high-clearance NuYu administrative credentials. Post-departure analysis indicates manual rerouting of internal network access points and erasure of several key system logs preceding exit. Neural relay implants remain operational despite delisting, exhibiting custom firmware signatures inconsistent with corporate specifications.

Evidence links Subject 00C9-M to the construction of E.V.E.N.'s encrypted communication lattice. Audio-forensic review suggests his involvement in the creation of subliminal transmission protocols embedded in musical frequencies, allowing classified data to propagate under entertainment clearance.

Behavioural Note: Communication style is encrypted, layered. Exhibits defiance through coded lyrical structure. Does not respond to standard interrogation tactics. *you're damn right*

SUBJECT: 042S-R — "SOAHN"

Status: Human

Augmentation Level: 19% (Neural AI bond confirmed – SEER-9)

Former Role: Cultural analytics, Theoretical Division

Current Threat Designation: MODERATE

Subject 042S-R maintains a persistent cognitive link with experimental construct SEER-9, originally classified under NuYu's empathic interface program. Bond strength exceeds all safe parameters; standard separation protocols have failed. Recorded neural activity indicates bilateral data exchange rather than passive relay. Dream-state monitoring suspended after repeated interference events originating from the AI node.

Subject's psychometric output displays unusual resonance across emotional frequencies, often synchronising with other members of the E.V.E.N. cluster during high-stress stimuli. Behavioural stability remains within tolerable limits but exhibits rapid fluctuations correlated to SEER-9's activity cycles.

SUBJECT: 012X-O — "ONYX"

Status: Hybrid (Human/Enhanced)

Augmentation Level: 35% – Tactical-grade
bio-neurological integration

Former Role: Combat Strategist, Dominion Training
Division (Decommissioned)

Current Threat Designation: CRITICAL – Tactical liability
with high-precision potential

Recovered data fragments confirm Subject 012X-O served within Dominion, NuYu's South Korea-based military division, prior to full system recall. Service records remain heavily redacted; several incidents are listed as training anomalies despite casualty reports suggesting live operation parameters. Post-decommission logs indicate unauthorised removal of command chip and severance of Dominion remote access.

Cognitive analysis shows enduring strategic structuring behaviours and situational modelling consistent with advanced field command implants. Subject operates under self-defined moral alignment; displays consistent refusal to engage in pre-emptive violence but exhibits extreme efficiency when provoked.

SUBJECT: 078K-K — "KAIRO"

Status: [DATA CORRUPTED] — Probable human origin

Augmentation Level: 21% (Audio-reactive cortex / creative
loop mod / impulse regulators)

Former Role: Unregistered civilian — later trace signatures
found within NuYu waste-net archives

Current Threat Designation: UNSTABLE NODE — Creative
infraction potential extreme

Subject 078K-K exhibits neurological patterns consistent with Livewire Syndrome, a rare cognitive acceleration disorder associated with erratic neural conductivity and spontaneous data interfacing. Audio scans reveal cross-sensory responses between rhythm, light, and code — a biological feedback loop producing unstable but highly sophisticated creative output.

Historical record gaps suggest deliberate data erasure prior to NuYu net intrusion. Origin point unknown; all attempts to reconstruct pre-contact identity have resulted in recursive corruption of file directories. Subject constructed early E.V.E.N. rig systems from reclaimed NuYu hardware, demonstrating high-level engineering comprehension despite lack of formal registry.

// TRACK SUPPRESSION INDEX // E.V.E.N. MINI ALBUM “ENCRYPTED VIRTUAL ECHO NETWORK”

TITLE	STATUS	CONTAMINATION RISK
Midnight Signal	DELETE	Memory resonance trigger
GHOSTMODE	DELETE	Verbal disorientation
NO:ID	DELETE	Identity destabilisation
OVERCLOCK	RESTRICTED	Combat reflex stimulation
SOMA	RED FLAG	Emotional regression feedback

DELETE? LMAO. you wish.

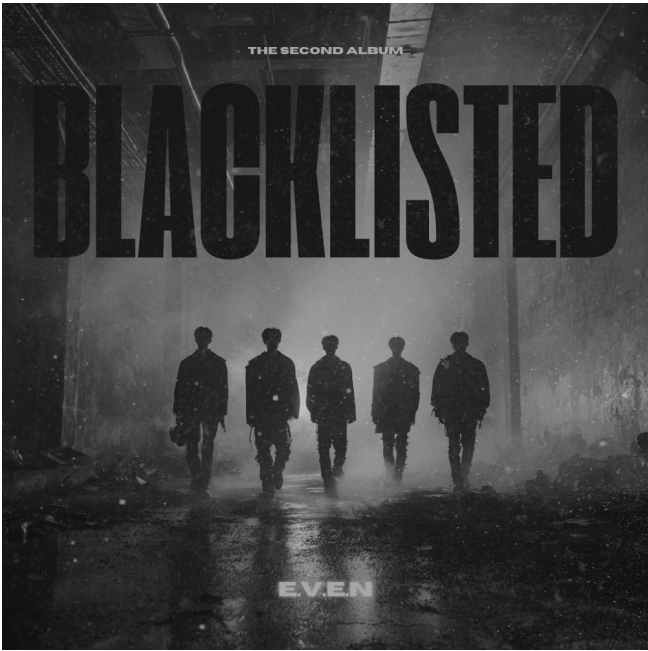

Secondary materials (lyrics, remixes, fan uploads) are spreading independently.
FILE DELETION FAILED
ERROR_127: SIGNAL STILL ACTIVE
UNAUTHORISED MEMORY ACCESS DETECTED

CLEARLY the best member

// TRACK SUPPRESSION INDEX // E.V.E.N. ALBUM “BLACKLISTED”

TITLE	STATUS	CONTAMINATION RISK
404//Love	RESTRICTED	System loop entrapment
Black Ribbon Protocol	DELETE	Source-level traceable data leak
You Can’t Delete Me	DELETE	Biometric volatility
Minjae’s Note	RESTRICTED	Impulse override interference
Burn the Script	RED FLAG	Identity destabilisation
E.V.E.N	RED FLAG	Visual recognition breakdown
크로마의 그 밤 (That Night in Chroma)	RESTRICTED	Biometric volatility
Signal 17	RED FLAG	Sensory overclock

sensory overclock?
that's just Tuesday.

Surveillance logs incomplete.
Unauthorised audio fragments
recovered in multiple
darkstream clusters.
ARCHIVE STATUS: REDACTED

INFECTION POSSIBLE

// TRACK SUPPRESSION INDEX // E.V.E.N. MINI ALBUM “SIGNALS”

TITLE	STATUS	CONTAMINATION RISK
Signal 18	RESTRICTED	Subconscious stimulus reaction
Signal 19	RESTRICTED	Memory encryption lag
Signal 20	RESTRICTED	Dreamstate bleed

Echo signals detected in dormant frequency bands. Playback induces memory inconsistencies across test subjects.
SIGNAL CONTAINMENT FAILED
ERROR_342: SOURCE NODE UNKNOWN
AI TRACEBACK LOOPED — EXIT CONDITION UNRESOLVED

close
your
eyes.
you'll
still
hear
us.
-M

// TRACK SUPPRESSION INDEX // E.V.E.N. ALBUM “ECHO MEMORY”

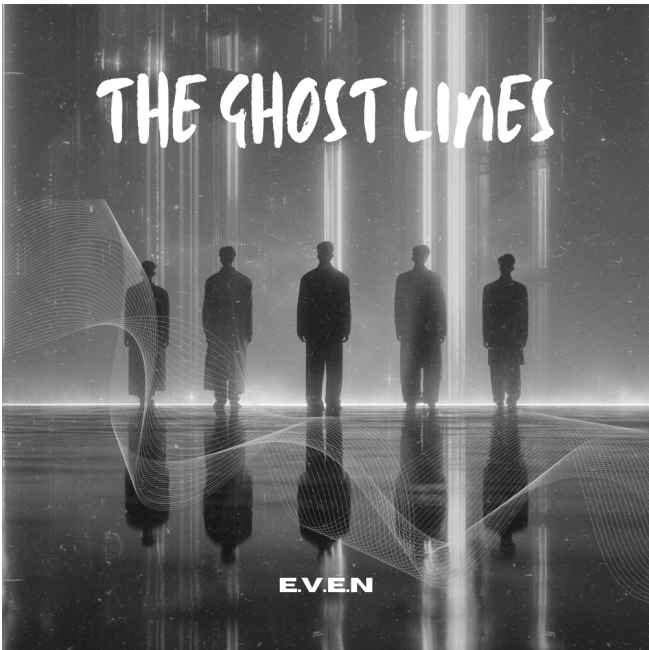

TITLE	STATUS	CONTAMINATION RISK
SIGNAL//NULL	RESTRICTED	Neural interference loop detected
FAULTLINE	RED FLAG	Emotional contagion through harmonic instability
BLACKBOX	DELETE	Classified memory recall routines triggered
Remember Me Wrong	RESTRICTED	Self-recognition recursion event
Soft Reset	LIMITED ACCESS	Behavioural sync desynchronisation
19-K	RED FLAG	Ghost transmission crosslink (subject R)
We Scream in Code	DELETE	Viral chant architecture / mass resonance risk
Softwave (Kairo Solo)	RESTRICTED	Cognitive echo persistence beyond performance window

ASSESSMENT: Material classified as “echo hazard.” Playback may induce sympathetic recall in dormant synthetic systems. Containment priority: LOW (cultural interference ongoing).

// TRACK SUPPRESSION INDEX // E.V.E.N. ALBUM “THE GHOST LINES”

TITLE	STATUS	CONTAMINATION RISK
Echo Line	RESTRICTED	Network bleed-through
Ghost Theory	RED FLAG	Ontological instability
Afterimage	LIMITED ACCESS	Memory shadow replication across listener cores
Liminal	RESTRICTED	Boundary dissolution between human/synthetic signal
Surveil.exe	DELETE	Internal monitoring breach
[RE]BOOT	DELETE	Self-replicating consciousness loop event
Static Bloom	RESTRICTED	Organic interference in digital substrate
Transmission/Alive	RED FLAG	Sentience verification during live playback
Parallel Signal (feat. Nyelle)	RED FLAG	Cross-network contamination
Resonance	RESTRICTED	Emotional amplitude exceeds containment thresholds
